

Delivering Field Campaign Data: Improving Your One-Stop Shopping Experience

Cameron Bates, Kathy Doty, Giri Palanisamy, Rolanda Jundt, Raymond McCord, and Richard Wagener

NEW FEATURES

Browsing and Searching

- Separate, sortable pages for **Past Campaigns, Current Campaigns, and Upcoming Campaigns**
 - Table sorting by date/duration/campaign name/site
- Field campaign data integrated into other ARM pages (**Instruments, Measurements, shopping cart ordering system**)
- Easy access to field campaign abstracts, preproposals, and full proposals
- Search for a specific field campaign using any or all of the following criteria:
 - Date
 - Location
 - Data Availability
 - Lead Scientist
 - Keywords
- Interactive **field campaign timeline**
- ARM's Google™ search engine expanded to include field campaign related documents.

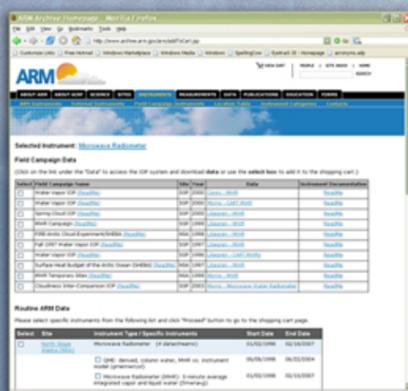

IMPROVED FEATURES

Ordering Data

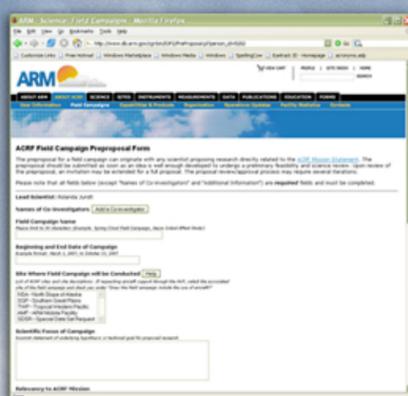

Field campaign data accessible from the:

- Shopping cart (throughout the site)
- **Past Campaigns** and **View All Campaigns** pages
- Field campaign abstract pages.

Submitting Preproposals

The form for initiating a proposal for a field campaign using ACRF facilities or resources was redesigned. All the questions were consolidated into a single screen. This provides users the opportunity to preview the entire form, which allows them to better develop their proposal.

FUTURE PLANS

Next Steps

- Continued expansion of field campaign data into **Instruments** and **Measurements** sections of ARM website
- Similar integration planned for "special" and PI datasets
- Further integration of field campaign data into the **Sites** section of the ARM website
- Highlighting "showcase" datasets
- Updates to **www.arm.gov** that will make new information more visible and provide RSS and subscription services.
